What is SSNAP?

This provider is involved in a project to make stroke care better.

We collect information about all stroke patients seen by this team and what care they receive.

This information is used to improve stroke care at this team.

This project is called the Sentinel Stroke National Audit Programme (SSNAP).

For more information:

Visit the SSNAP website:

Sentinel Stroke National Audit Programme

Information about SSNAP
What it means for you and your provider

Northern Ireland

Why is this hospital/team collecting my information?

This is a national project. All health care settings (hospitals and organisations that provide services for stroke patients directly from 0-6 months) will take part. Participation shows that this organisation is committed to improving stroke care.

What information is collected?

Information collected can be used to decide where improvements need to be made. The provider collects information on the care that you are given over a 6 month period, starting from the time you arrive in hospital.

For full details of what is collected, please ask the person who gave you this leaflet or contact the SSNAP team.

Is any confidential information collected?

No patient identifiable information is collected in Northern Ireland.

Why is SSNAP helpful?

If we can show that patients are less likely to die or have another stroke when they get good stroke care, it will encourage all healthcare settings to improve their stroke services. It will also encourage the funders to support the most important stroke services.

What if the information gets lost or stolen?

The methods for keeping your information safe are very advanced. Your information is stored safely in accordance with NHS recommendations and standards.

For further details about how we process your data:

Patient information sheets are available here:
